# **SITUATION SUMMARY**

#### Cal EOC Incident – 2014 Drought

• SOC / Inland REOC remains activated in support of 2014 Drought

Weather of ConcernThere are no significant Watches or Warnings in effect at this time

Active Weather Warnings, Watches and Advisories by County: <a href="http://www.wrh.noaa.gov/sto/brief/wwa\_bc\_cal.php">http://www.wrh.noaa.gov/sto/brief/wwa\_bc\_cal.php</a>

# **WEATHER**

#### **WEATHER SYNOPSIS BY REGION:**

#### NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

#### **Eureka Weather:**

A series of upper lows will bring scattered showers and isolated thunderstorms to mainly the interior each afternoon through late in the coming week.

#### **Medford Weather:**

The low pressure will continue to move across northern Sacramento Valley today and will be near Reno by this evening. Rainfall could range from a quarter to half inch of rain caught underneath the core of the storm. The atmosphere will stabilize by 2100 hours tonight with mainly showers overnight. On Tuesday the low pressure will have moved east of the area but there will be a series of disturbances moving through. Another low pressure will move into the eastern Pacific and send another round of short wave disturbance inland on Wednesday.

#### Reno Weather:

Upper level low pressures will bring additional rounds of showers and high elevation snow today through Wednesday. Cool and showery conditions will likely continue through the end of next week as a series of low pressure areas affect the west. Wednesday will have the best chance for thunderstorms, with precipitation chances decreasing by the middle of the Memorial Day weekend.

#### San Francisco Weather:

Below normal temperatures with mostly dry conditions are expected to continue through Friday. There is a slight chance for showers in the North Bay Mountains this afternoon and North and East Bay Mountains on Thursday as weak low pressure disturbances move onshore. High pressure and warmer conditions are expected over the Memorial Day weekend.

# **WEATHER**

#### **WEATHER SYNOPSIS BY REGION:**

#### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:**

#### Sacramento Weather:

Variable clouds and mainly mountain showers and afternoon thunderstorms through the week as a series of weak low pressure systems move across California. Daytime high temperatures are forecast to remain below normal.

#### **Hanford Weather:**

Low pressure will remain over the region until tonight and bring a chance of sprinkles and light rain over the San Joaquin Valley, as well as afternoon showers and thunderstorms over Sierra Nevada and adjacent foothills. Afterward, generally dry conditions and near average temperatures are expected, except for afternoon and evening showers with isolated thunderstorms over the higher elevations of the Sierra Nevada for the rest of this week.

#### **SOUTHERN CALIFORNIA:**

#### Los Angeles Weather:

A few low pressure systems will move through the area this week and result in slightly below normal temperatures and partly to mostly cloudy skies. There will be a slight chance of showers and thunderstorms over the mountains today, and then again late in the week. High pressure will move in next weekend allowing for a marginal warming trend.

#### Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

A weak low pressure system will move inland through California today, a second weak low pressure system will be near the California coast Wednesday and Thursday, and a third weak low pressure system will move inland through Southern California Friday. This will continue below average inland temperatures, a deeper marine layer with areas of coastal low clouds and patchy fog extending well inland, and stronger onshore flow with gusty west winds in the mountains and deserts. There is also a chance of showers late Thursday night and Friday. High pressure will bring dry weather with a warming trend for Saturday through Monday.

#### **Southeast California Weather:**

Low pressure off the California coast will move inland today bringing increased cloud cover and a slight chance of showers to the mountains. Sunny skies and dry weather will return Tuesday with temperatures slightly below normal. Yet another upper level low pressure system will approach the region late in the week although primary impacts will be cooler temperatures and increased cloud cover.

## **CAL OES 2014 DROUGHT**

#### Cal EOC Incident – 2014 Drought

- The SOC, Inland, Coastal, and Southern REOCs and the Santa Barbara County EOC are activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take
  place on alternating Wednesdays.
- Cal OES Regional (Inland, Coastal, Southern) conference calls continue to occur on a weekly basis.
